

SPINEL RC FUND Fund Fact Sheet – September 2025

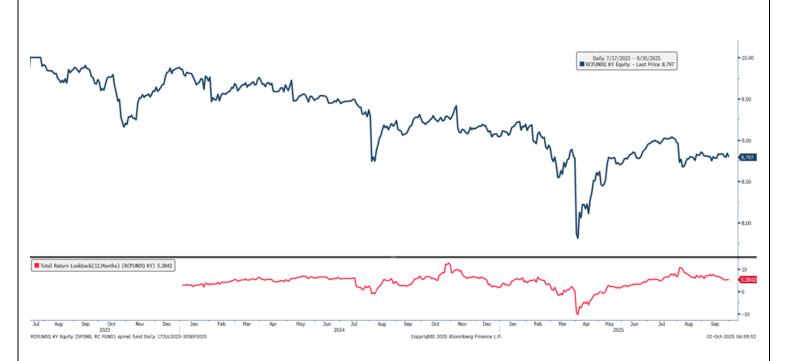

Investment Objective

The objective of the Fund is to generate a constant stream of cash flows by investing into Reverse Convertibles (RCs), Structured Notes, derivatives and cash or cash equivalent instruments.

Investment Strategy

The Fund will invest primarily in Auto-Callable Reverse Convertible and other Structured Notes related to equity, currency, commodities and indexes, derivatives and cash or cash equivalent instruments [for liquidity purposes]. The investment process is designed to harvest markets' volatility and convert it into cash flows whilst controlling the idiosyncratic risk of any single name investment exposure and the related business sector via concentration limits.

NAV since inception and rolling 12 months total return

This is an actively managed fund that is not designed to track a benchmark. Past performance does not predict future returns. The value of investments and the income derived from investments will fluctuate and can go down as well as up. A loss of capital may occur.

NAV and AUM		Returns Including Coupons Paid and Net of All Fees and Costs

Bloomberg Ticker	RCFUNDQ KY Equity	2024	1.9%	
		Inception to Date (since 17th July 2023) RT095	8.6%	

Major Fund Allocation Changes

The fund ended September 2025 with total investments of \$92 million across 25 RCF notes together with approximately \$1.4 million in cash.

A call provision was triggered due to the strong performance of underlying stocks within RCF 60, RCF 61 and RCF 62 leading to an early redemption of \$13.5 million cumulatively. In addition, RCF 37 matured and the fund received 6900 shares of Adobe as a result of the worst performing underlier (Adobe) closing below the barrier level on final observation day. 1900 shares were sold with a remaining balance of 5000 shares currently in the fund. This represents 2% of the net asset value of the fund.

All the proceeds from the notes called and disposition of Adobe shares along with excess cash were subsequently reinvested into RCF 69, RCF 70, RCF 71, RCF 72 and RCF 73 ensuring the funds remained fully invested.

Four of these new notes were 'Digital with Memory' payoff which is a structure that allowed us to increase the average coupon to 13.70% p.a.

The fund also recorded subscription and redemption activity during the month, resulting in a net inflow of \$1m.

General Considerations on the Stock Market

Total Coupons Paid Since Inception

Coupon Payments

Next Payment Date

7th August 2025

In September, the US equity reference index delivered a return of 3.5%, roughly in line with performance in August. The volatility index remained stable at 16.3% by the month-end. Meanwhile, the average 12-month residual life of the US Treasury yield moved lower to 3.5%. These factors had little to no material influence on the secondary market pricing of the individual RCs held within the fund.

Disclaimers					

The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested. The information herein is for illustrative purposes only and reflects current market practices and is not intended to constitute legal, tax, accounting, or financial advice; investors should consult their own advisers on such matters. At all times prospective investors considering an investment in the Fund should carefully read the Private Placement Memorandum and the Terms & Conditions of the Subscription form. Investors are reminded that the past performance of any investment is not a guide to future returns. All performance figures are of fees. The Fund may incur further expenses (not included in the above Ongoing charge) as permitted by the Private Placement Memorandum.

Important Risk Considerations

■ Counterparty risk a party that the Portfolio transacts with may fail to meet its obligations which could cause losses. ■ Custodian risk insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio. ■ Derivatives risk derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested. ■ Exchange rate risk changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. If applicable, investment techniques used to attempt to reduce the risk of currency movements (hedging), may not be effective. Hedging also involves additional risks associated with derivatives. ■ Liquidity risk the Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand. ■ Market risk the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded. ■ Operational risk material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.

Complete information on the risks of investing in the fund are set out in the fund's Private Placement Memorandum.
